

## SGCN and Habitat Stressors

**Level 1 Threat** Biological Resource Use

**Level 2 Threat:** Gathering Terrestrial Plants

**Description:** Harvesting plants, fungi, and other non-timber/non-animal products for commercial, recreation, subsistence, research or cultural purposes, or for control reasons

**No Species Currently Assigned To This Stressor.**

**Habitats Associated With This Stressor:**

<b>Macrogroup</b>	<b>Northeastern Floodplain Forest</b>
-------------------	---------------------------------------

<b>Habitat System Name:</b>	Laurentian-Acadian Floodplain Systems
-----------------------------	---------------------------------------

**Notes:** Impact is partly removal of plants themselves, but mostly from trampling and ATV access in floodplains

## SGCN and Habitat Stressors

### Level 1 Threat Biological Resource Use

#### Level 2 Threat: Gathering Terrestrial Plants

*The Wildlife Action Plan was developed through a lengthy participatory process with state agencies, targeted conservation partners, and the general public. The Plan is non-regulatory. The species, stressors, and voluntary conservation actions identified in the Plan complement, but do not replace, existing work programs and priorities by state agencies and partners.*
